### **DETAILED ACTION**

This Office Action is response to the election filed on 9/14/04. Currently, claims 1-40 are pending.

Claims 27-40 are withdrawn from further consideration pursuant to 37 CFR 1.142(b), as being drawn to a nonelected device claims, there being no allowable generic or linking claim. Applicant timely traversed the restriction (election) requirement in the reply filed on 9/14/04.

#### ***Election/Restrictions***

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-25, drawn to Combination, classified in class 438, subclass 424.
- II. Claim 26, drawn to Subcombination, classified in class 438, subclass 14.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because combination as claimed does not require indicating an effective dielectric constant corresponding to the thickness of both the lower dielectric material for the lower dielectric layer and the upper dielectric material for the upper dielectric layer. The subcombination has separate utility such as in other combinations that do not require etching a trench in the integrated circuit substrate.

Art Unit: 2812

Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II, restriction for examination purposes as indicated is proper.

A telephone call was made to Timothy R. Croll on 11/22/04 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Stanetta D. Isaac whose telephone number is 571-272-1671. The examiner can normally be reached on Monday-Friday 9:30am -6:30pm.
